MEMORANDUM TO: The Director/NPIC
FROM: SIO/CIA
SUBJECT: Army Report TAK-3000-61

1. It appears that Army Report TAK-3000-61 (Shuang-Ch'eng-Tsu), dated November 1961, has incorporated certain pertinent facts and figures arrived at through the joint efforts of an NPIC photo analysis team operating under JN-240/61.

2. The SIO/CIA questions the release of this material to an agency outside NPIC without prior approval from all SIO's as directed in NPIC Regulation No. 5-110, dated 14 September 1961. Perhaps this approval was obtained but we do not recall it.

3. Even if approval was obtained, in justifying TAK-3000-61, it was stated that it was not to be a PI report. This is subject to question if the following is considered:

Report length -- 42 pages

Title page, Preface, Content, etc.....6 pages
PI Material, including pages 10-29
titled "Keyhole Evidence".....22 pages
Non-PI material14 pages

42

Of 7 drawings, listed on page 5 of the Army report, 4 state: "Adapted from NPIC - G....."

4. The preface of TAK-3000-61 states "This analysis of the Communist Chinese Shuang-Ch'eng-Tsu Missile Center has been prepared at this time (November) by the Office of the Assistant Chief of Staff for Intelligence, Department of the Army, in order to give the entire U. S. Intelligence Community the benefit of current Army intelligence views on this important facility." In the introduction to TAK-3000-61 it states, "Photo Reconnaissance Mission revealed for the first time the existence of a missile test/training center in North China."
